May 2, 2015

## Instructions:

- Download the code 4pics1word.pde from the link : “<https://github.com/ghoshrahul/Project>”
- Download the software Processing 2.2.1 to your destined folder and install it. The link for downloading is “<https://processing.org/download/>”.
- Install Android SDK library . The link for downloading is : “<https://developer.android.com/sdk/installing.html>”
- To install the Android SDK library for Processing , follow the instructions given at : “<https://github.com/processing/processing-android/wiki>”.
- Once everything is installed, connect your android phone to your computer, let Processing detect the phone, then run the sketch 4pics1word.pde to install it on the phone.
- The app should be installed and loaded onto your screen.
- Good luck in cracking the game!.
